

SYMPOSIUM ON PALLIATIVE CARE

Towards a Narrative of Hope 21-23 May 2024

GENERAL AIM OF THE SYMPOSIUM:

The symposium aims to reinvigorate hope within the Church, other faith traditions, and society in the context of end-of-life issues; identify needs and tools that will better respond to current challenges in implementing palliative care more widely; and build a strong network of experts and practitioners who can help with the development and promotion of palliative care resources. To do this, we will explore palliative care within the wider framework of building a culture of social responsibility at the local, regional, national, and international levels.
