

Notes on the Covid19 Emergency

- Pandemic and universal brotherhood, March 30 2020 (in collaboration with the Vatican Covid-19 Commission)
- *Humana Communitas* in the era of the pandemic. Untimely reflections on the rebirth of life, July 22 2020
- Old Age: our future, February 2 2021 (in collaboration with the Dicastery for Integral Human Development)
- Friendship with persons with disabilities: the beginning of a new world, June 14 2021 (in collaboration with the Vatican COVID-19 Commission)
- The Pandemic and the challenge of education, December 22 2021 (in collaboration with the Vatican COVID-19 Commission)
- Vaccine for all. 20 points for a fairer and healthier world, December 29 2020 (Vatican Covid-19 Commission in collaboration with the Pontifical Academy for Life)

It is time to look back on the hardest months of the pandemic to question what we have learned and to make a strong commitment to ensure that we do not put aside our reflection about health policies, life, the importance of vaccines, and universal access to care.

For this reason, the Pontifical Academy for Life considers it opportune to republish in a single volume the documents that have addressed the various aspects of the health and social emergency in the years 2020-2021 (some of the documents were drawn up in collaboration with the Vatican Covid-19 Commission coordinated by the Dicastery for Integral Human Development). Now our task is to look ahead, proving that we have learned the lessons of the pandemic, to educate to universal brotherhood, taking seriously the encyclical *Fratelli Tutti*.
