10-12 November 2025

**AI AND MEDICINE**  
**THE CHALLENGE OF HUMAN DIGNITY**  
International Congress

AI presents tremendous opportunities to improve health and health care delivery for the «relief of man's estate» (Francis Bacon), but at the same time, presents enormous risks of dehumanizing the relationship between the physician and the patient. It is critical that the Church serve as an intermediary between this evolving technology and the Culture.
